

Certificate of Analysis

Semax 11 mg

Sequence : Met-Glu-His-Phe-Pro-Gly-Pro

Compound : Semax
Lot number : 2025-04-07
Analysis date : 2025-05-01
Purity % : 99.68%
Method : HPLC-UV-MS

Client : Transforma Peptides
www.transformapeptides.com

PubChem CID: 122178

Note: Injectable peptides may contain salts and sugars to aid in solubility and act as pH buffers.
These are not normally detected using UV and are not considered impurities.

Semax

Sequence : Met-Glu-His-Phe-Pro-Gly-Pro

Mass Spectrometry (MS) – Identity Test

Identity confirmed using HPLC-MS

Molecular weight calculated using monoisotopic m/z values from mass spectrum

Expected monoisotopic mass : 813.35 Da

Measured monoisotopic mass : 813.35 Da

Molecular weight confirmed

Note : Monoisotopic m/z values are not easily seen in full spectrum view for larger molecules and peptides.

The dominant isotopic peak (base peak) shown in the spectrum below can be used to approximate the average molecular weight frequently reported by vendors and databases as a secondary means of confirmation.

Recorded MS spectrum
